

Example of finding Euclidean Basic Shapes in panda bear.

Quick Tips

Play "I Spy". Find a circular shape in the room. Say, "I spy a circle" and have your child find it. Let your child "spy" a triangle (or other shape) in the room and you find where it is. Use the shapes on the opposite page so they know what to look for.

Can you and your child find the BASIC SHAPES that make up the panda bear?
